

Supply Chain Solutions Aligned to Meet the Demands of the new Millennium

Supply chain sources of key electronic components offered to CM & OEM clients where there are geographical pricing imbalances so to significantly lower client's cost of components & lower client's lead-times for components

Supply Chain solutions for synergistic electro-mechanical-design-service companies structured to provide a vast array of supply chain solutions to clients which meets their needs dynamically

Collaborative Synergy

confidential and proprietary

Solutions Set Development

- **The challenge** - the market realities of global competition, short product life cycles, regional advantages, shrinking product margins, and shrinking organizational resources in managing dynamic & complex supply chains.
- **The need** - small, innovative, flexible, and adaptive companies who can form fast and flexible working relationships in order to create the many variations of products, services, and supply chain solutions that different customers need at any given time wherever they might be located.

Solutions Set Development

- **The structure** is an alignment of multiple & collaborative supply chain & service companies who have developed relationships with specialized electro-mechanical-design-service companies, and can collaborate together in a partnership approach towards solving customer needs quickly and precisely at low operational costs.

Solution Set Attributes

- **Attributes of the needed Solution Sets**
 - The use of small, flexible, & innovative supply chain companies with low costs
 - Complimentary solutions for electronic industry and customers
 - Utilizes global sourcing solutions & resources
 - Multiplies & leverages each supply chain company's resources (distributed)
 - Low cost alignment of companies (agreement or even a handshake)
 - Ability to sell multiple solutions to customers tailored to the customer's needs
 - When the customer needs it

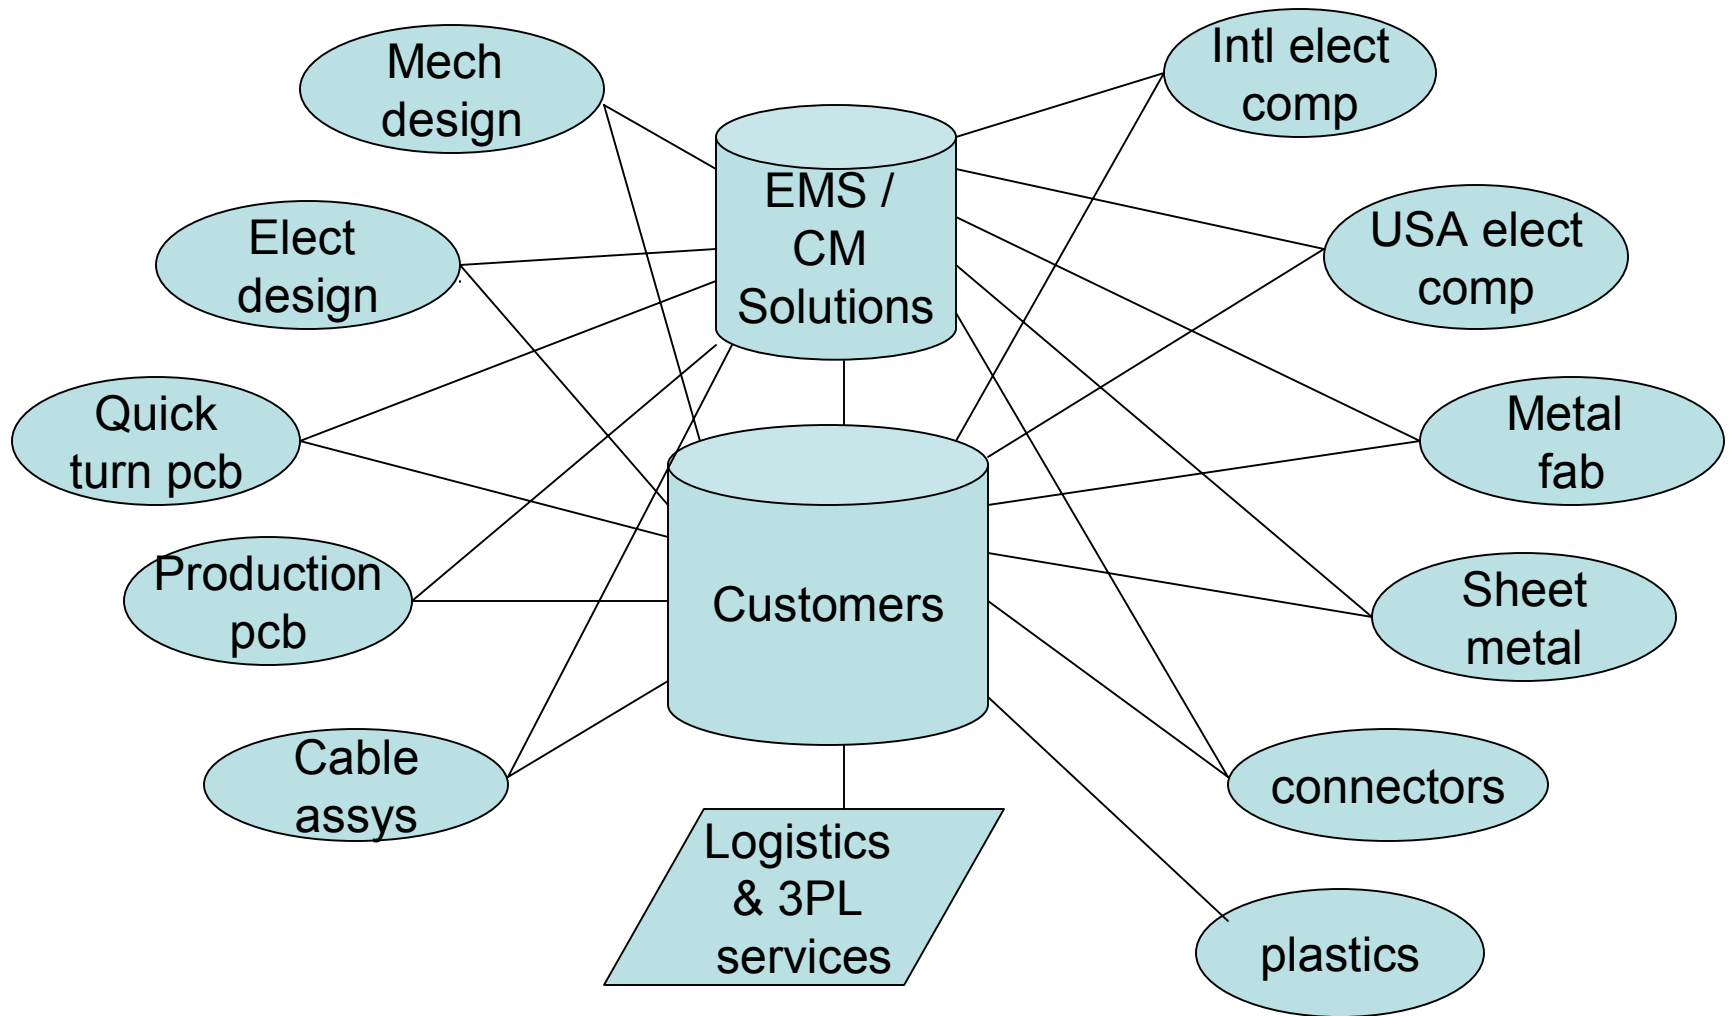

What these Solution Sets Offer

- Immediate cost savings to domestic companies who cannot justify or move to an offshore CM solution
- Attractive offering for:
 - domestic & international companies
 - large & small customers
- Can address great combination of needs of customers & is adaptive to changes in their needs over-time
- Supports product transformation of USA builds with offshore sub assembly production & sourcing
- Complimentary commodities used within electro-mechanical products and industry
- Lowest cost for major commodities & sub-assemblies

Solution Set Developed

- In short, ISC Networks is a new supply chain collaborative company where we've created alliances & networks of synergistic electro-mechanical-design-service companies to meet the dynamic needs of the customers today & tomorrow.
- We are an asset to our customer's constrained resources in responding to changing product life cycles, significant NPI implementations, varied volume/mix sets of products that require active cost reduction & best in industry supplier performance solutions.
